Dominating the future market

CONFIDENT

International Prominence and Recognition

Founded in 1996, the Head Office is located in the beautiful city of Yangzhou, China with a total land area of nearly 50 acres, 700 employees and a 150,000 square meter central warehouse. Registered capital is over AU\$26,000,000.

The group controls seven subsidiary companies, and the diversified industrial chain incorporates furniture, electromechanical, wood, transportation, finance and supplementary fields.

The furniture division supplies covers, screens, desk systems, file storage, office chairs and paint furniture. Our commercial office range integrates a rich heritage of experience and design in order to continue our success in within the international market including Australia, Americas, Middle East, Southeast Asia including many large and medium-sized cities worldwide. Cubespace has a production base and distribution facility supported by strong production capacity and a mature sales network to service our global clientele.

Australian operations are headed in Melbourne, Victoria and supported by a warehouse and head office incorporating 6000 square meters and holding in excess of \$2 million in stock .

C U B E S P A C E

UNIQUE

*Distinction through design and
development*

Outstanding research and design is the core competence within Cubespace. CUBESPACE DESIGN is an integral networking HUB connecting all our divisions. As intelligent technology is changing rapidly, commercial office furniture is also becoming smart. We think the goal of an intelligent office is not to simply bring the Internet to the office but also allow employees to be inter-connected. Subsequently, Nanjing University of Telecommunication and Technology Industrial Park have cooperated to build a unique laboratory with the determination to design “Intelligent Office” and facilitate Cubespace’s delivery as a first in the world for intelligent furniture. Cubespace is leading the market toward the ultimate Intelligent Office.

BRILLIANT

Exemplary Technical Expertise

From our inception, Cubespace adopted a high quality, technological innovative approach. We utilise the best German HOMAG production lines, electronic cutting saws and automatic linear edge banding machines. All Interfaced with precision instruments such as CNC multi-function work centres. This guarantees both our quality and accuracy of the final product. The group has additionally implemented comprehensive ERP systems to incorporate the operation, production and inventory management within the company. Resulting in the facilitation of a rapid reaction platform between suppliers, customers and enterprises.

The company's unique of glue-free design technology endows the range with the benefit to recycle and reuse, awarding recovery rates up to 85% on all steel products.

Latest nano non-toxic, mildew resistant, antibacterial coating technology is applied for both customer and environmental protection.

Further demonstrating its dedication to the environment, quality and its clientele, Cubespace implemented ISO standards including;

- ISO9001 Quality Management
- ISO14001 Environmental Management
- OHSAS18001 Occupational Health and Safety
- ISO14025 Environmental Labels and Declarations.

We also maintain strict evaluation and operating procedures for every raw material purchase and process. Our team routinely check and recheck the manufacture quality and we support the professional design, consulting, distribution, installation and integration with a solid seven year warranty / 24-hour response.

EVOLVING

*Developing to meet a transformational
market*

Cubespace offers a comprehensive portfolio of solutions that are designed and engineered to meet the evolving needs of the modern day workplace.

We pride ourselves in creating quality products and providing the highest level of service to our customers.

At Cubespace we embrace unique perspectives, fresh thinking and ingenuity that helps create valuable solutions for our customers.

We respect our customers' needs and ambitions, understanding that their satisfaction is the greatest measure of our success.

As technology changes Cubespace leads. Driven by innovation and research & development our team is constantly setting the standards.

collaborate

— Let's work together

DESIGN

Creating collaborative work spaces that work!

Innovation is fostered by building connection between people, integrating new, differing perspectives and social interactions.

Collaborative work spaces support equal sharing and diverse social exchanges. Employees have the opportunity to exchange ideas, information and explore creative potential.

Maersk Line

"The resulting product is beautiful. It fit the design intent and the budget. On top of that the service and attention to detail was very impressive. I wouldn't hesitate to use Cubespace again."

Ingenero Technologies

"By providing employees with a beautiful workspace, a new sense of pride has been infused here. Not only has morale lifted but the overall dynamics of our work environment have improved."

Houzz

"We were very impressed with Cubespace and its ability to meet the various needs of our internal departments. One company doesn't always fit all. In our case, there were a lot of ideas and requirements put forth, but Cubespace products were able to address them all. We are very happy with the new workstations, furniture and the overall "space."

Morrison & Foerster

"We found Cubespace's products, service and pricing to be unbeatable and decided to also go with them for our private office, reception and conference room furniture needs. We are very pleased with how everything turned out"
